World Scientific

Publishing Content

World Scientific publishes across 11 subject collections:

- Mathematics
- Physics/Nonlinear Science
- Chemistry/Materials
Science/Nanotechnology
- Computer Science
- Engineering
- Environmental Science
- Medicine and Healthcare
- Life Sciences
- Business and Economics
- General and Popular Science
- Social Sciences and Asian Studies

About World Scientific Publishing

Quality Assurance

To ensure that World Scientific publications are of high quality.

Book proposals are vetted by an independent referee, and submitted papers to Journals must go through a peer review process.

More than 100 journals indexed in Web of Science

More than 1K books indexed in Web of Science (Book Citation Index)

More than 2K books indexed in Scopus

World Scientific Publishing

Impact Factors Highlights

World Scientific is delighted to announce the impressive performance of its 2022 Impact Factor, which is a testament to the exceptional quality and influence of its journals across various fields. Here are the noteworthy highlights:

- Among the 64 journals with existing impact factors, 41 maintained or improved their impact factors
- 46 journals have obtained their inaugural impact factors
- More than 66% of World Scientific journals (110 journals) are now indexed in Web of Science and have impact factors

We would like to draw attention to the following outstanding accomplishments:

- 9 journals ranked in Quartile 1, two of them securing positions in the top 10 of their respective categories
 - American Journal of Chinese Medicine (ranked 3rd)
 - Journal of Mathematical Logic (ranked 4th)
 - Analysis and Applications
 - Communications in Contemporary Mathematics
 - Fractals
 - Mathematical Models & Methods in Applied Sciences
 - International Journal of Neural Systems
 - International Journal of Information Technology & Decision Making
 - Journal of Industrial and Integrative Management
